HOW TO CONFIGURE IN SHOPIFY ADMIN (Online Store > Navigation):

- Open Main Menu:** Go to *Online Store > Navigation > Main menu*.
- Creating Sub-items (Nesting):** To place an item inside a parent (e.g. putting *Hydration* under *BY CONCERN*, and *BY CONCERN* under *COLLECTIONS*), drag the menu item handle (the 6 dots icon) directly underneath the parent item and **drag slightly to the right** to indent.
- Header Only Links:** For category groups like *BY CONCERN* or *BY RITUAL* that don't need a standalone landing page, enter # in the Link field.
- Page Anchors:** For section-specific scroll links (e.g. */pages/technology#how-to-use*), paste the exact relative path in the Link box and press enter.
- Save:** Click **Save menu** at the top right to instantly update both the desktop header and mobile drawer navigation.
