Fragrance & Fragrance Intensity	shopify.fragrance / shopify.fragrance-level	List
Product Form (Lotion, Serum, Mask)	shopify.product-form	List

CRITICAL IMPLEMENTATION NOTES FOR SHOPIFY ADMIN SETUP:

1. **Preserve Exact Keys:** When defining Custom Data in Shopify Admin (*Settings > Custom data > Products / Pages*), you can give fields English names in the Admin UI, but ensure the **Key & Namespace** match exactly as specified above (e.g. `custom.descriere`, `custom.mod_utilizare`) so the Liquid theme templates render seamlessly.
2. **Rich Text vs File Reference:** For content tabs, make sure fields like `custom.descriere` are set to **Rich text**, and image counterparts like `custom.descriere_image` are set to **File (Images only)**.
3. **Search & Discovery App:** To enable the filter.* metafields on collection pages, activate them under *Shopify Search & Discovery > Filters*.
